

8
hulk - it is not as painful as right
be expected. ^{from its appearance} has been treated with
Calomel - Mint Acid. (10)

Peter Keenan, V.2. p. 131,
The surface looks fully white. The
complains of smarting. Calomel
applied. (10)

Waters, Col 2. P. 129
Scab has formed at the upper part
of the dorsum of penis, and another
below ulcer in left groin, apparently
from the discharge being unrescuted
than here - the edge of the sore in the
right groin, though prominent, appears
as if the cuticle was proceeding
to the bottom of sore - this is not ob-
vious in the other groin, which
appears still with its red and dil
white line. The old scab on the
and of herpes adheres - the sore under
it, rarely discharges. ^{The scab} It is round
above the surface. Mint Acid (23)

Darby, Darcy.
Col 2. P. 142
Now scab which remains are be-
coming painful. Mouth not sore.
Urt. Solut - double strength (17)

Saint Dorad,
The right groin has discharged of a
very minute hole - the surface of it
has become flat and shrivelled - there
does not appear any opening when the
black part van - the left groin appears
to be forming cuticle over the ulcer - the
white spots on inside of penis have ex-
tended, and there is a red line round
some of them - Urt. Acid. (15)

Pat. Joggins, Vols 9
Some of the white points are becoming
more prominent and fully ulcerated
on the top - there are others which ap-
pear to be fresh - a few have appeared around
them - the large ulcer in crease in side
Calomel applied. Urt. Acid (12)

John Kelly,
The sore has extended in breadth
and depth - has much darting
herm. has a purging - throat -
head ache - Urt. Acid. discharge green (14)

James King - V.2. p. 85,
Discharge from groin very considerable,
son of pain not enlarging.
leading, burning - Urt. Acid, at
last. Zinc - White id. of chan in away.

Burningham (Col 2. P. 139)
The groin scab and dry. The end of
old skin forms a ridge - channels
in angle of thigh healed. Urt. Acid.

Maryat Penman, -
Although the Condyloma are so
white in the middle, they are still
elevated, and their circumference
forms a dark ring. The appear-
ance in the perine is like what
into what an irregular patch -
Tinct. Sulphur. Zinc 43 -

Pat. Maryat, V.2. p. 116,
Surface has got better looking -
is not so prominent. at the
right side there is a faint appear-
ance as if there was a cuticle in
forming. Urt. Acid. - no pain -
(16)

E. J. Joggins -
This patient has been put on
Calomel, and Tinct. Sant. (14)
