

Also Lewis - Lewis when it lies on
 scrotum also affected, soft, yellowish
 white, rarely in compression.
 one appears with a rounded edge.
 (Some scrotum in throat when scrotal-
 long - an ulcer on inner of left
 cheek, immediately behind angle -
 surface raised - margin also raised,
 and depressed between them - surface
 dirty yellow. edge white, margin
 whitish like edge of lips. Was
 denied stings - had son. 5 years ago. had
 ulcer which has left cavity, and son
 throat two years ago - had an ulcer on
 penis, which has left a stigma about
 1/2 inch long - present affection of
 scrotum commenced about 4 weeks ago in
 a hump - and itching - it is now
 itching - Mat. And.

Dougherty (Col 2 - P. 145)
 Lips swollen - whitening lips thick -
 margin of one dent has become
 elevated - surface depressed - has
 the same appearance it had on the
 penis - very like Donnelly - edge of
 penis very turned, but not so
 white - left And & Sultz (28)

James Moore V. 2. p. 115,
 The surface of groin tucked back -
 the mouth of ulcers can. up hourly -
 don't discharge much - left And.

John Doud (Col 2. P. 141)
 Right groin has shrunk a little -
 it is very dark about middle - the
 opening of other not enlarging. edge
 of skin red. surface yellow red -
 discharge thin - of course when a
 crack would gush at angle of
 hip - left And - (4)

Isaac Wright (Col 2. P. 142)
 The cuticle is extending over the
 fungus proliferation of groin from
 the lower part, and the edge of wa-
 arulation at that point is red -
 white and -

Ben Doran V. 2. p. 191 3
 Surface of groin in groin, which is
 about the size of a pea, is white
 the edge of skin thin and red - the
 center of groin darker colored - discharges
 a good deal - (12)

John Kelly. At 23. weeks at
 tubercle St. No. 35. a Saylor ^{power}
 ulcer at angle of groin & hip in at
 left side (see drawing) hump in
 hip beyond them and also swelling -
 swelling and a deep a purulent -
 or at lower part of hip -
 swelling on penis with a white edge -
 matter purulent yellow - edge thick
 & white - compound (5) white edge in
 a white hump - has been discharging

Margaret Newman (Col 2. P. 92)
 The condensation - an 'heaving'
 white in the middle - left And - 9
 the wound is hardly better - she had a
 son months, when the last acid was ordered.

Wm Foster, At 22. weeks at
 tubercle with Mr. Thompson of Holly wood -
 The penis has been removed by a former
 Then is an ulcer now in its place
 ulcer, & extends on the penis, and on
 the hip, appears as if a piece had
 been cut out with a hump - edge very thick,
 some parts punctated - the color of the
 penis is a dark purple, that of the hip
 is lighter in color - not much pain.
 This man was at Lewis St. some days
 ago - He then had a large indurated,
 scrophulous like tumor in the upper
 & fore part of left thigh, and a very
 superficial healthy looking one in
 the situation of the present. it was
 then nearly covered with cuticle - He
 has been discharging a good deal
 of lute - the tumor in his groin
 has not advanced - It is about
 five weeks since this began. He
 lost the penis two years ago
 from a chancre, which set on
 of study - Selfish. last. e.
 And - see drawing (4)
