

John Kelly -

The disease has extended by much since yesterday. It is threatening with a white Pharyngitis etc. The surface of skin is becoming raw. Pain is very acute. Suffering at night - p. 111. Suffering at night - p. 111. Suffering at night - p. 111.

Mr. Johnson,

The entire of the Stomach surface is cleaned - there is no more pain. He is taking the powder. I hope, and I have sight of - kind it to day to the heart (16)

John -

The eye is all inflamed, and the globe of eyeball is a disfigurement - he is taking 6 pairs of Salts, & 1/2 of Tart. Emet in the day. Allusion has been applied to his eye - (21)

*Handwritten notes in margins:*  
The disease has extended by much since yesterday. It is threatening with a white Pharyngitis etc. The surface of skin is becoming raw. Pain is very acute. Suffering at night - p. 111. Suffering at night - p. 111. Suffering at night - p. 111.

Wm. Foster,

The skin in contact with the air is colored like the black wash. The air - uniform on the surface is more clean, but the skin of which on the face is more white - skin is white. (17)

Peter Newman,

The skin more inflamed, and the skin more extended - (20)

Matthew Loppins, V2. p. 117,

considers himself better - some new pustules occasionally come out - the discolored centres of the patches are becoming all white like the centre - complains of pain in his head at night - says he is chilly during the day. He does not sleep very well. General redness of his throat. There is an enlarged gland in the triangular space of the neck, which has become red and sore - the surface - two pustules have appeared on the internal surface of the lower eyelid of left eye - near the angle - (24)

John Jay,

He says he is better in every respect. White Acid. which has very marked in the throat - (20)

Shos Lynch -

The skin has extended - they are very and have flat surfaces - prominent. There are two on the glans, which are excavated - white acid. (20)

John Doran,

The eruption of aphthous spots are extending to middle, discharge from parotid glands - white acid. (26)

Ben Doran,

The skin appears better - is drawing more today - This can would appear to be a very slow one to John Kelly, but not so far advanced -
