

J. H. Jones 41. Montgomery St -
 Striking lower - Achoses or
 papules with small pustules
 diffuse - minute chancreous
 ulcers when top of papule or
 pustule removed
~~small~~ - minute ulcer at
 penum 4 months ago - ^{healed} now
 Eruption about 4 weeks
 standing - Skin of penis &
 scrotum thick ^{and sore} - white
 appearance in the buttocks
 leg darker - penum in the
 which was blistered.
 left iliac region - spots on
 his shoulder, penum in
 (114)
 his loins - under scrotum
 maculated with some of the matter -

Pat. Vernon -
 Drawing made
 when with raised edges
 burning bent at one point.
 (113)
 very solid. Mus. Hyd -

John Mitchell -

Ptyriasis - on breasts and
 on back of neck - irregular form,
 slightly elevated - small pointed -
 throat swollen - head lumps and
 when on corona - no hairy -
^{some itching - don't entirely disappear}
^{on penis - their entire number} -

John Brown
 Very large lumps - tend
 color - skin thick -

Vernon
 This appears to have been a case of
 ulcers with elevated edges from the feet -
 fungus not advancing -
 W.H. Solent (114)

John Lawler -

Now shots coming out. Those
 which were out ^{are} fading -
 often stands in points & well
 he appears in good general health -
 W.H. Solent. (114)

Biddy Plunkett -

Pain turned, covered with
 minute yellow pustules
 some in the state of pustules
 pustules of a numerous kind
 on other parts of her body -
 glands very tender - looks
 then short - her watery
 intolerance of light - no
 pustules on eye - some
 venousity, dark vessels
 round corner - I found
 had a sister who had
 humors of that kind -
 This child has been
 ill a week - the
 eruption increased in
 extent for her eyes - There
 is not much redness of conjunctiva - the
 vessels appear to have a little way into edge
 of corner, not on its surface, but in its
 substance -
