

24th. Says his heart is son-
 et it looks better, the tubercles
 on his thigh are fast fading.
 The secretion is faster looking.
 (p. 38)
 24th. Med. communita.

John Johnston -
the surface is becoming chertier -
the coals are still falling in -
(42)

Robert Thorne,
The morning has cleared, and the
sun has heated up. The plum,
& purple appear turgid and
inflated. S. Lake.

James Sabesan (Col 2.)
P 123

Older former symptoms have been
cured, but an ulcer has formed
below the surface of another -
had connexion about three
weeks ago, and it is about
six days since this ulcer
commenced - the Dr. is about to
excise it by an ogee pen. further,
lately - the surface appears cov-
ered with a thin scab - and
the whole has the appearance
of a deep gap cut out -
in drawing. - Mnt. Acid -

Cornelius Rury (Vol 2-P 32)
He applied the blister to the
root - complaint of an aching
leg in the arm -
L. P. Redemonte (35)

Joseph Roocke.

The lower seats have been re-
moved from the G. and the
surface under is elevated into
a porous growth on all of
them - the room is also chey-
ry wood. The opening about the
W. of a beam, oval, is a little
lined - the ^{and surface} sides of rows on being
are becoming elevated - I intend to
examine whether the other surface could
be seats are elevated or not - (30)
Cal. pr. g. the mother lot. right to G-

Ed. Hanson. (Vol 2 - P. 125)

The warts can still a tendency to how-
the warts have been occasionally of-
fend to them. Then an several yellow
been scabs scattered on different parts of his
body, principally on the hips, the wrists,
the arms, and his hand have a number
of pustules like scabs. They are at-
tended by itching. The scabs are composed
of an indurated scaly areola. They are
the result of pustules of a yellow color.
The and sulphur ointment without use.
The Plumbago pits have now been
ordered - p v - his ord - (31)

Tuesday, May 10, 1830, -

Wm Lister

The enormous misery of ul-
cers at present has become ex-
tended ^{and increased from without inwardly} and of a healthy ul-
cer [^] the symptoms of both are
humiliating - that on pre-
sented ^{and elevated.} [^] esp. than in.
(32)

Keary -

The surface is studded with minute
purple colored papules. There
is a white skin on back of neck
and - the opening into tentacles 35
perhaps 100 so wide - 4 ft.
