

Pat Sweney

The legs ulcer has a very sloping appearance, but the others are healthy. (16)

James Murphy

All the ulcers appear to be healing except the ^{two} on the upper of his arm - several very superficial shots, about the size of a pin point - have appeared. The caustic applied to these & others fully - it made the skin black in the former. (18)

Maryann Moon at Dr.

7 John Lane, Main Town St.

Applied on 29. ^{the} eruption of small pox on day standing - the pustules were solid - The following day more matured - placed in larger quantity - the surface white and excreted, when the crusts were removed - caustic applied to some of the most prominent - did not give any harm - This day the several eruptions are over, but the pustules to obstruct the caustic was applied here and advanced - caustic applied to 2 today - one on face, two on right forearm. It has made the skin black, and the surface a lighter shade - and has caused an avulsion to be covered at the ulcer -

Keogh
from work, ulcers healed -
Pat. Cal. c. Opio.

Lie Dempsey

The tumors in the groin have rather decreased - The ulcer has contracted - The surface has risen - the color less brown - the skin more rounded and some appearance of new, red cutis - Has taken 12 pills since yesterday - feels well, & looks weak - They have enlarged his bowels - The caustic of arm repeated, and pills continued. (17)

John Hegley

Ulcer on groin covered with lymph, narrow and deep - pus - not so deep - caustic fully applied - surface of skin at coronal lip white - but covered with lymph - red - The ulcer at groin covered with lymph - caustic by yesterday's caustic - caustic fully applied to coronal lip. (17)

John Smith

Ulcer very much contracted - and healing more by contraction than by the formation of new cutis - caustic fully applied to surface which is covered with lymph - and opens on the surface being drawn back - (18)

Therese Lynch

67. Main Lane -
Two children - one 9 years, the other 10 months - The former has two shots like Lacy's eruption on her thigh - her throat is sore, and has somewhat the appearance of scarlet fever - she has been in her bed and room - has been ill for a long time - going away - The other child has an eruption at the point where a draining tube was -
